Address: Ramkrishnapally, Karimpur, Nadia, WB, IN 741152

Career Objective

Innovative and adaptive Computer Science (AI/ML) student with a strong passion for transforming ideas into intelligent and visually engaging digital solutions. Skilled at leveraging AI-assisted development tools to build functional prototypes and continuously exploring new technologies at the intersection of creativity, logic, and automation.

Education

2023-27	Brainware University 7.35/10 Bachelor of Technology in Computer Science & Engineering (specializing in Artificial Intelligence and Machine Learning)
2023	12 th (Senior Secondary Examination) 60% Central Board of Secondary Education
2021	10 th (Secondary Examination) 75% Indian Certificate of Secondary Education

Projects

1. सKHA – Digital Mental Wellness Hub (SIH 2025)

A comprehensive full-stack mental wellness platform for higher education students.

- **Roles:** Student, Counsellor, Peer Volunteer, Admin.
- **Features:** AI companion, peer-support forum, guided journaling, resource library.

2. Organ Donation & Transplant Matching System

Verified, hospital-based platform for donor–recipient matching.

- **Features:** Map visualization, real-time alerts for urgent organ/blood requirements, verified hospital data.

3. ZapCommerce (Ongoing)

Focuses on small businesses that currently manage orders manually on WhatsApp. The platform would use AI to convert chats into structured orders, automate payment links, and provide a centralized dashboard for order tracking and management. My first move would be onboarding a few local businesses, validating the workflow, and refining the automation based on real customer interactions.

4. Developers Club Website — Brainware University (Ongoing)

Collaborative digital hub for student developers to connect and share projects.

5. codebaseGPT — AI Developer Tool

Context-aware AI tool that understands entire codebases. Built at Code For Change 2.0 (1st Place).

- **Features:** Knowledge graph, AI PR reviewer, issue/commit intelligence, security scanning, cloud code container.

6. TRAFFIQ — Intelligent Traffic & Emergency Coordination

Real-time multi-platform traffic system. Built at The Neotia University Hackathon (1st Place).

- **Features:** Green corridor routing, adaptive signal control, ML analytics, live incident reporting.

Technical Skills	
Languages	Python, Java
Web Tools	React (basic), Tailwind CSS, No-code/AI-assisted Web Builders
AI Tools & Platforms	Google Colab, ChatGPT, Hugging Face, Cursor
Design	Figma,Stich, Canva, UI/UX principles, Creative Layouts
Operating Systems	Linux, Windows
Version Control	Git, Github
Achievements & Activities	

Hackathon Wins

- 🏆 **3rd Place — Code For Change 2.0 (24-hour Hackathon)** | CodeNEST @ NSHM Knowledge Campus, Durgapur. Built **codebaseGPT** — an AI-powered developer tool with context-aware chat, knowledge graph, AI PR reviewer, issue/commit intelligence, security scanning, and cloud-based code container. Team: 0101 Crew.
- 🏆 **1st Place — Hackathon @ The Neotia University (12-hour)** | Built **TRAFFIQ** — a real-time multi-platform Intelligent Traffic & Emergency Coordination System featuring green corridor routing for emergency vehicles, adaptive signal control, ML-driven analytics, and live incident reporting. Team: BuildBros.
- Participated in multiple Hackathons building human-centered AI prototypes focused on Healthcare and Education.
- Core Member of the Tech Club at Brainware University — organized technical discussions, coding sessions, and collaborative innovation events.
- Concept Designer for the Techxibition Website (University Tech Fest) — design layout, user flow, and branding.
- Class Representative (CR) — facilitated communication between faculty and students.
- **Google Campus Ambassador Program** — Selected (Confirmation Pending).

Hobbies & Interests

Driven by an inherent curiosity and a creative disposition, I am keenly interested in the intersection of technology, design, and psychology.

- **Design & Technology:** Passionate about UI/UX design, exploring AI tools for rapid prototyping, and visual storytelling.
- **Analytical & Writing:** Analyzing human behavior for empathetic design and composing reflective pieces on technology and emotional intelligence.
- **Creative Arts:** Photography and poetry.
- **Outdoor Activities:** Trekking and adventure riding.
